

SAFETY AND ENVIRONMENTAL POLICY

In a technological and industrial environment that is constantly evolving, ULIS incorporates employee safety, health and well-being at all levels, while ensuring its impact on the environment is controlled.

With regards to its activity, ULIS agrees to:

- Prevent pollution, personal injuries and health damage
- Continuously improve management systems and resources
- Respect legal and other applicable requirements.

These commitments will be met thanks to everyone's contribution in order to:

- Periodically **evaluate** the risks to people's health and safety
- Improve working conditions
- Ensure strict management of chemical products and prevention of pollution risks
- Maintain an operational organisation when faced with emergency situations
- Train employees and raise awareness about risk prevention and respect for the environment
- Involve our suppliers in the safety - environment initiative
