

QUALITY, SAFETY AND ENVIRONMENTAL POLICY

Infrared is becoming accessible to all, and will improve people's safety while helping them save energy.

ULIS's objective is to design, manufacture and market effective thermal image sensors of the highest quality required by the most demanding applications, so camera manufacturers can be competitive and overcome the limitations associated with infrared.

In a constantly changing technological and industrial environment, ULIS ensures the safety, health and well-being of its employees at every level while controlling any impact on the environment.

In keeping with its values and to ensure ongoing improvement, ULIS is committed to:

SOLIDARITY

+ Developing long-term partnerships with our external suppliers

+ Involving all employees in actively preventing QHSE risks, encouraging their development and improving the quality of work life

INNOVATION

+ Developing our expertise

+ Anticipating our clients' needs and expectations and ensuring their total satisfaction and renewed trust

INTEGRITY

+ Guaranteeing compliance with applicable legal requirements and standards relating to employees, all relevant interested parties, business and products

+ Meeting the relevant requirements of relevant interested parties

PERFORMANCE

+ Ensuring performance while protecting the environment and employee health and safety

+ Ensuring the rigorous management of chemical products and the prevention of the risk of pollution
